OUR PHILOSOPHY

At **Advanced Orthopedic Designs** we believe in an individualized approach to patient care. While most people can be treated with more traditional designs, some require us to **"think outside of the box."** We evaluate each person individually and recommend the design that is appropriate for them based on their medical diagnosis, needs, lifestyle, occupation, and desired function. Our designs are limited only by our imagination, and we are quite an imaginative group. We truly enjoy coming up with innovative, intuitive, and effective devices.
